RENZO PÉREZ TUEROS

IT PROJECT COORDINATION | SOFTWARE DELIVERY | TECHNICAL OPERATIONS

renzin@gmail.com | 995 022 849 |

PROFESSIONAL SUMMARY

Technology professional and Computer Systems Engineering student with experience supporting the delivery and maintenance of enterprise software, process-automation platforms, AI-enabled applications, and digital content. Experienced in clarifying business and user requirements with cross-functional teams, implementing and validating features, troubleshooting delivery issues, supporting CI/CD deployments, and creating user-training materials. Combines hands-on technical knowledge with a collaborative, delivery-focused approach suited to IT project coordination and junior project management roles.

CORE COMPETENCIES

- Requirements clarification and analysis
- Software implementation and delivery support
- Functional testing and validation
- API integration and system coordination
- User training content and documentation
- Task organization tools: Trello, Notion
- Project Task Organization & Progress Tracking
- Cross-functional team collaboration
- Technical issue tracking and resolution
- Client implementation support
- Process automation and workflow improvement
- Maintenance and continuous improvement
- Technical tools: Git, Jenkins, Nginx

PROFESSIONAL EXPERIENCE

Tapia Valley Software Co. | *Software Application Development*
January 2023 – November 2026

- Contribute to the delivery and ongoing improvement of enterprise applications across computer vision, business analytics, process automation, and AI-assisted media workflows.
- Count-Box: implement image-processing functionality and dashboards for monitoring results in an application that detects and counts chicken-meat boxes from camera images.
- Arts Analytics: develop business-data tools, including JSON/Excel conversion and database CRUD functionality, and support troubleshooting and maintenance.
- DUNAMIS: maintain an Angular-based process-automation demonstration platform by resolving defects, maintaining frontend/backend API integrations, validating functionality, and supporting English/Spanish localization.
- Corporate website: maintain site functionality and implement UI, content, responsiveness, and performance improvements.
- Collaborate with stakeholders to translate business needs into promotional and instructional video content; produce bilingual subtitles and training materials for enterprise applications.
- Support software quality and delivery through functional validation, issue resolution, and ongoing maintenance.

PRO20 | *Frontend Developer*
February 2023 – March 2024

- Contributed to the development and maintenance of Daktico, a corporate training and gamification platform.
- Implemented feature enhancements based on business and user requirements, including UI/UX improvements and external API integrations.
- Worked with cross-functional colleagues to clarify requirements, deliver changes, test functionality, and resolve defects.
- Supported platform reliability and usability through troubleshooting and continuous maintenance.

Lundero & Asociados SAC | *Frontend Developer*
July 2022 – January 2023

- Developed and maintained features for IAmauta, an enterprise platform for business-process automation and business-rules management.
- Converted client and project requirements into interface and workflow updates; integrated REST APIs and supported functional testing and validation.
- Managed Jenkins-based CI/CD deployment pipelines for multiple client projects.
- Provided technical support and maintenance for implementations serving MINCETUR and clients in Nicaragua and Costa Rica.
- Collaborated with cross-functional teams to analyze requirements, troubleshoot issues, and communicate project updates.

Grupo Comercial Perú SAC | *Creative Automation & Design*
January 2022 – July 2022

- Built custom Adobe Illustrator plugins to automate repetitive design and publishing workflows and improve operational efficiency.
- Worked with design and publishing teams to identify needs and deliver tailored automation tools and visual assets.

SELECTED INDEPENDENT PROJECTS

Real-Time Chat Platform — Full-stack application using React, TypeScript, Vite, Prisma ORM, PostgreSQL and Socket.IO, with authentication, role-based permissions, multi-channel chat, and REST APIs.
github.com/derpmagician/KanbanPostgress-TS

Kanban-TS Platform— Full-stack application using Vue.js, TypeScript, Bun, Hono, and MySQL, with authentication, role-based permissions, multi-channel chat, and REST APIs.
github.com/derpmagician/quick_chatrooms
MangaTextCapture App — JavaScript/Python UI for batch image handling, OCR text extraction, and translation workflows.
github.com/derpmagician/MangaTextCapture
URL Shortener Platform — Node.js, Express, and MongoDB application with REST APIs, persistent storage, and link management.
github.com/derpmagician/shorten

EDUCATION & TRAINING

Universidad Privada del Norte (UPN), Lima, Peru — Computer Systems Engineering — student, 7th semester (2026)
Holberton School, Lima, Peru — Front-end Specialization Certificate (2022)
Holberton School, Lima, Peru — Foundations Certificate (2021)
Instituto San Ignacio de Loyola, Lima, Peru — Professional Technical Degree in Network and Communications Engineering (2015)
Universidad de Lima, Lima, Peru — Systems Engineering studies (2004)

TECHNICAL KNOWLEDGE

Project Coordination: Task tracking, requirements coordination, incident follow-up, and deliverable monitoring.
Software Development: SDLC, API integration, application maintenance, and process automation.
Agile & Workflow Management: Kanban, task prioritization, and workflow tracking.
Technical Documentation: Requirements documentation, technical specifications, and user guides.
Development Tools: Git, GitHub, TypeScript, JavaScript, and PostgreSQL.
Collaboration: Cross-functional collaboration, technical communication, and user training.
