FORMACIÓN ACADÉMICA

- **UNIVERSIDAD PERUANA DEL NORTE - UPN, LIMA, PE 2026**

Computer Systems Engineering student (7th Semester)

- **HOLBERTON SCHOOL, LIMA, PE 2022**

Certificate of completion Front-end Specialization

- **HOLBERTON SCHOOL, LIMA, PE 2021**

Certificate of Completion Foundations

- **INSTITUTE SAN IGNACIO DE LOYOLA, LIMA, PE 2015**

Título de profesional técnico en Ingeniería de Redes y Comunicaciones

- **UNIVERSIDAD DE LIMA, LIMA, PE 2004**

Estudios de Ingeniería de Sistemas

- **Languages:** English Advanced, Spanish (Mother Language)

TECHNICAL KNOWLEDGE

Programing Languages

Python, Javascript, Typescript

Frameworks: Flask, React, Vue, Angular, Node y Bun

Databases

MongDB, Firebase, Supabase, MySQL

Generative AI

ComfyUI for workflows with image generation

Qwen for video generation

Use of Gemini API, Claude Opus, GPT

Use of Antigravity, VSCode, OpenCode

Others

Git, Nginx, WSL

EXPERIENCIA LABORAL

Tapia Valley Software Co. (Tech company dedicated to developing platforms for enterprise data sampling and analysis using artificial intelligence)

Frontend Developer | January 15, 2023 – Present

- Web Application Development:
 - Arts Analytics – Data visualization platform that enables the analysis of business data from Excel (.xlsx) files, developed with React.js. (System development and maintenance)
 - DUNAMIS – Process automation demonstration platform developed with Angular. (bug fixing, API integration updates, English/Spanish localization, and system testing)
 - Count-Box – Demonstration platform that uses artificial intelligence for object detection, inventory control, and dashboard-based data visualization, developed with Vue.js. (System development and maintenance)
 - Corporate Landing Page – Development and maintenance of the company's official website.

PRO20 (Technology company specializing in the design, development, and implementation of digital platforms and software solutions.)

Frontend Developer | February 12, 2023 – March 13, 2024

- Daktico – Corporate training gamification platform. (system functionality, improving the user interface and web styling, and integrating external APIs)

Lundero & Asociados SAC (Technology company specializing in the optimization and intelligent automation of business processes for public and private sector organizations through tailored solutions.)

Frontend Developer | July 12, 2022 – January 12, 2023

- IAmauta – Angular 11-based enterprise platform for intelligent business process automation and business rules management (feature development, bug fixes, API integrations, functional testing, UI customization, and Jenkins-based CI/CD deployment management for projects serving MINCETUR, Nicaragua, and Costa Rica)

Grupo Comercial Perú SAC (Educational publishing company specializing in the development, production, and distribution of educational books and academic content.)

Creative Automation | January 03, 2022 – July 03, 2022

- Developed and maintained custom Adobe Illustrator plugins for workflow automation, process optimization, and productivity enhancement across design and publishing operations.

INDEPENDENT SOFTWARE PROJECTS

Real-Time Chat Platform (Full-Stack Project)

Designed and developed a full-stack real-time messaging platform using Vue.js, TypeScript, Bun, Hono, and MySQL. Implemented user registration, authentication, role-based permissions, multi-channel chat functionality, and RESTful APIs for secure user and access management.

Repo: https://github.com/derpmagician/quick_chatrooms

AI-Based Emotion Recognition and Voice Detection System

Built with Vanilla JavaScript and Chrome APIs, utilizing browser-specific features for audio processing, speech detection, and AI-powered emotion recognition. Optimized for Google Chrome to ensure full compatibility and optimal performance.

Repo: https://github.com/derpmagician/tts_vtt_example/

Page: https://derpmagician.github.io/tts_vtt_example/

URL Shortener Platform (Full-Stack Project)

Built a full-stack URL shortener using Node.js, Express, and MongoDB. Implemented RESTful APIs for link creation and redirection, along with persistent storage and basic link management features

Repo: <https://github.com/derpmagician/shorten>

OshiPushle

Built using Vanilla JavaScript, this interactive Wordle-style game challenges users to guess Oshi Push TCG card names from image-based clues. Implemented game mechanics, real-time feedback, and client-side logic for user interaction.
